

George Hinton

Industrial Designer

Summary

Through founding startups and delivering professional design work for companies, I have developed a unique skill set that enables me to identify opportunities, collaborate with teams, and create innovative products aligned with business goals and ambitions. I am confident in CAD design and experienced in working with manufacturers to bring products from concept to reality.

Experience

Freelance Industrial Designer - 2025 to Present

- Working with clients on concept development, 3D modelling, and prototyping.

Founder - Pronto Campers - 2023 to 2025

- Created a modular van conversion system allowing dual-use vehicles.
- Led design, prototyping, and business development.

Jewellery Designer — St. Lo Gioello — 2024

- Designed and prototyped jewellery pieces balancing luxury aesthetics with manufacturability.

Rapid Prototyper — CraftCloud — 2020 to 2022

- Produced prototypes using 3D printing and CNC methods.
- Gained hands-on experience in rapid iteration and testing.

Education

Bachelor of Arts (Hons) - Industrial Design (2:1)
Loughborough University

Acheivements

Strengths

Design for Manufacture:

Experience developing products for my own companies, integrating manufacturability into design and establishing relationships with manufacturers worldwide.

Business and Marketing:

Experience in creating products that align with business models and brand image, ensuring designs fit seamlessly within a company's commercial and marketing strategy.

Forward Thinking:

Enthusiastic about innovation, anticipating future needs, and identifying opportunities for what hasn't been done yet.

Software:

SolidWorks

Blender

Rhino

Fusion
